

## American Dream Rag

I been outta work since the plant shut down  
They shipped our jobs to China, but they left behind our town  
Tumbleweed rollin' through  
It feels like we've all been screwed

Every day's a struggle, but we get by  
(They took) Everything we had and we don't ask why  
We can't afford to drink, but we still get high  
Livin' the American Dream

Politicians say, "In Banks, We Trust"  
They gave 'em all the money that once belonged to us  
In the name of red, white, and blue  
It feels like we've all been screwed

Every day's a struggle, but we get by  
(They took) Everything we had and we don't ask why  
We can't afford to drink, but we still get high  
Livin' the American Dream

I used to have insurance and a decent job  
But a banker bought the business with intent to rob  
He closed all the factories, shuttered every store  
Thousands out of work makes the stock worth more

Debt and unemployment we got up the wazoo  
Change we can believe in is long overdue  
It's past time to sing the blues  
It feels like we've all been screwed

Every day's a struggle, but we get by  
(They took) Everything we had and we don't ask why  
We can't afford to drink, but we still get high  
Livin' the American Dream

Washington's a cesspool; Wall Street's just as bad  
They trashed the constitution and took everything we had
